

# Abstract Topics

## EXTENDED CLINICAL TRIALS ABSTRACT SUBMISSION IS NOW CLOSED!

Thank you for your submissions and contribution to the success of WSC 2023.

Late-breaking scientific abstracts should contain new, scientifically rigorous information that has not been presented previously in a stroke conference. Results of a clinical trial should likely have a significant impact on clinical practice and/or to make significant advances in the stroke scientific field. We will accept trials that are completed after this submission deadline **September 3, 2023**, but in time to release the final results in a late-breaking session of WSC 2023.

Begin preparing your late breaking submissions, based on the following topics:

- Clinical Trials
- Hyperacute Stroke Treatment Including Prehospital Care and Stroke Services
- Endovascular Therapy for Acute Stroke, Aneurysmal SAH, AVMs
- Stroke Etiology and Clinical Aspects incl. Uncommon Stroke Disorders and Challenging Cases
- Cerebral small vessel disease
- Stroke Neuroimaging
- Stroke Nursing
- Stroke Rehabilitation and Recovery
- Post Stroke Care and Complications
- Vascular Cognitive Impairment and Dementia
- Community Awareness, Advocacy and Stroke Support

## Activities

- Life after Stroke (incl. Care Givers)
- Stroke Biomarkers
- Stroke Prevention (Primary and Secondary)
- Intracerebral Hemorrhage
- Subarachnoid Hemorrhage
- Neurocritical Care
- Basic Science and Translational Research
- Knowledge Translation and Implementation Science
- Health Services
- Stroke Outcomes
- Data Sciences and Artificial Intelligence
- Global Health
- Other Topic
